# Quote Of the Day

BY, Shweta Herlekar 12<sup>th</sup> June, 2018

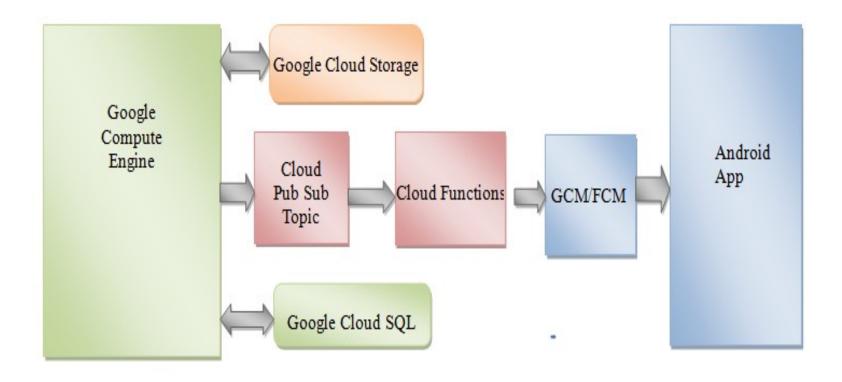

#### Agenda

- Requirements
- Proposed Technical Solutions
- Comparison
- Q & A

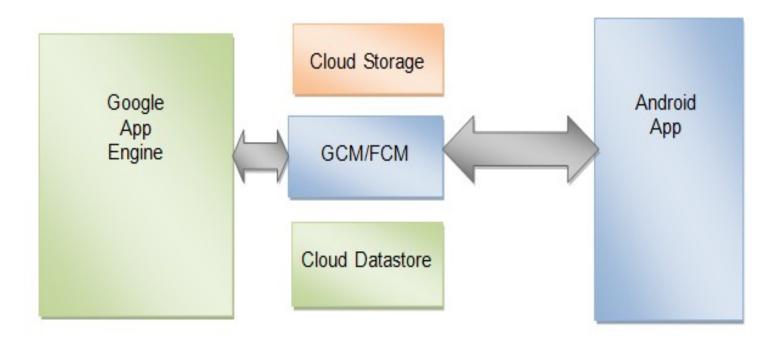

### Requirements

- App should allow user to login with Google credentials
- The system should push the quote to the app.
- App should show the notification for the quote.
- App should provide the setting to change the time slot for notifications.
- App should provide user interface for quotes.
- App should allow to view the quote individually with download and share option.
- App should provide log out option

#### Technical Solution 1

#### Technical Solution 2

## Comparison

	Approach 1	Approach 2
Cost	\$100-120 per month (GCE VM : \$0.76 per hour, GCM plan : \$25 per month,)	\$30-50 per month (GAE: \$0.05 per hour, cloud storage: 0.026 per month, data store: 0.18 per GB)
Performance	Good performance even for 10,000 users	Good performance for 200-300 users
Development efforts	12 weeks	6 weeks

# Comparison (continued)

	I	I
	Approach 1	Approach 2
	1. High performance	1. App engine
	and scalable VM's	provides fully
	2. Cloud functions	managed application
	provides event-driven	platform.
Pros	processing	2. App engine allows
	3. Fast reporting,	familiar language
	targeting and	tools.
	optimization in	3. Datastore: Fully
	advertising and media	managed NoSQL
	feature of pub sub.	object based
	4. This approach can	database.
	be extended to	
	subscription based	
	model.	

## $Comparison ({\tt continued})$

	Approach 1	Approach 2
Cons	<ol> <li>Compute engine         VM's changes IP         once stopped.</li> <li>Maintenance is         mandatory.</li> <li>Cost concern.</li> </ol>	1. App engine provides limited processing capabilities.

# Question & Answers

### Thank You!!
